Product Name :
Bearing Friction

Product Code :
LBNY-0005-101000124

Description :

Three different bearing materials for sliding bearing shells
Stainless steel shaft
Drive by cable drum and weight set.
Base plate of anodised aluminium.
Experiment in sliding bearing friction with various material pairings and comparison with rolling bearings
Box to house the components.
Flywheel of galvanised steel.
Experiments in rotational dynamics possible.

Technical Specification :

Bearing Friction
