**Product Name :**  
Forces in a Howe Truss

**Product Code :**  
LBNY-0005-101000128

**Description :**

Investigation of bar forces in statically over determinate trusses  
Strain gauge to measure force on each bar  
Measurement amplifier required  
Surplus bar, longitudinally adjustable  
Straight and inclined loading possible  
Software to evaluate measurement data  
Experimental set-up in frame.  
Storage system to house the components.

**Technical Specification :**

Forces in a Howe Truss

**Laboratory Instrument India**
