**Product Name :**  
Basic Hydraulics Learning System

**Product Code :**  
LBNY-0005-10300045

#### **Description :**

Panels and has the capacity to add another set to the opposite side to double your basic hydraulics training capacity. Basic Hydraulics Learning System introduces industry-relevant hydraulic skills while showing how they apply to fundamental hydraulic principles, such as pressure and flow. After completing this learning system, learners will not only understand concepts like flow rate versus cylinder speed and pressure versus cylinder force, but also be able to operate, install, design, and troubleshoot basic hydraulics for various applications. Storage slots are located under the work surface where learners can conveniently store component panels until they are needed. The Basic Hydraulics Learning System mobile workstation is constructed of durable welded steel to provide a sturdy, long-lasting learning station.

#### **Features:**

Features standard industrial-grade components in order to provide learners with real-world experience. Panels can be easily removed and repositioned as necessary to facilitate the completion of the tasks. Maximize your basic hydraulics training area by providing double the learning capacity of most systems. Introduces industry-relevant hydraulic skills while showing how they apply to fundamental hydraulic principles.

#### **Technical Specification :**

##### **Requirements:**

Computer: See requirements  
Electricity  
Hydraulic Oil  
Hand Tool Package.
