Product Name :
Determination Of Viscosities And Resistance Coefficients

Product Code :
LBNY-0005-10300071

Description :

Flexible system that can be used for the study of fluid properties and particles resistance coefficients.
Autonomous equipment requiring only power supply.
Determination Of Viscosities And Resistance Coefficients equipment is designed to determine the viscosity of different liquids and to study resistance coefficients of various geometric shapes.

Technical Specification :

Performable Experiments:

Determining drag coefficients for each body.
Determining the drag coefficient for spheres in relation to Reynoldss number.
Determining the viscosity of liquids.
Determining drag coefficients for each geometrical shape.
