Product Name :
Solar Powered Robotic Sets

Product Code :
LBNY-0002-700005

Description :

Solar Powered Robotic Sets

Technical Specification :

Solar powered robotic sets

The solar science kit can build 13 different types of robots, which can move on land or water. Help kids develop manual dexterity, problem solving skills, self-confidence and promotes the importance of teamwork.

This Bluebell toys is powered by the sun and no batteries required, the robot kit includes a solar power panel that collects solar heat energy into an electric energy drive motor, which drives the gears to make the machine run smoothly.

The science kits are designed to enhance your children's science, technology, engineering and math skills. Its strong practical ability, which has cultivated the spirit of scientific exploration with the help of parents.
