Product Name :
Educational Building Bricks Set With Motorized Parts and Programmable Modules

Product Code :
LBNY-0002-700006

Description :

Educational Building Bricks Set With Motorized Parts and Programmable Modules

Technical Specification :

Educational building bricks set with motorized parts and programmable modules

Building robot is challenging but not far too advanced, perfect for kids 8 through 12 and provide them countless hours of fun and creativity. Inspire early learners to explore coding concepts can help kids learn cognitive skills like critical thinking and problem solving, while they're also having fun assembling the robot and making the robot work.

Excellent Instructions For Easy Assemble: With 468 pieces that snap together, this robot-building kit is a slightly advanced building sets for boys 8-12. Don't worry, this stem robot included a step-by-step guide to building an example and a simple APP that even non-readers can follow, your kids will love this science kit.

Remote & App Control: This robot can move smoothly in all directions, whether on flat or rough ground, rotate up to 360 degrees, and has flexible, rotating joints. With voice-controlled and path-controlled functions, kids can use the remote or app to move the robot anytime at home.

Perfect Gift For Child: All pieces of this robot are made of kid-friendly, non-toxic materials and can be washed in cold or hot water, and it owns all ideal features in robotics at a reasonable price. With a building-block construction akin to, this robot is a perfect present for your child.
