Product Name : Water Hammer And Surge Cham

Product Code : LBNY-0005-103000180

Description:

Pressure sensor behind the water chamber for measuring The pressure wave Pipe section with solenoid valve and two pressure sensors For measuring water hammer Functioning of a surge chamber Pipe section with ball valve and surge chamber Volumetric flow measurement via supply unit Surge chamber designed as transparent PMMA tank.

Technical Specification :

Technical Data:

Pipe section for pressure oscillations Length: 5875mm, inner diameter: 26mm Copper Ball valve Surge chamber Inner diameter: 50mm Height: 825mm Pipe section for water hammer Tank: 50L Distance between sensors: 3000mm Solenoid valve, closing time: 20...30ms Copper Length: 5875mm, inner diameter: 26mm.
