Product Name :
Pressure Distribution On A Cylinder

Product Code :
LBNY-0005-103000224

Description :

Pressure distribution around a cylinder subject to transverse incident flow
Cylinder with radial hole for pressure measurement
Determination of the pressure curve along the measuring section with up to 8 pressure measuring points
In conjunction with total pressure sensor measurement of the total pressure in the wake of a cylinder
Display and analysis of the measured values using the software
Rotatable cylinder for pressure measurement at any angle adjustment
Electronic detection of the angle
Scale for angle adjustment.

Technical Specification :

Technical Data:

Cylinder
Inner diameter: 21mm
Outer diameter: 25mm.
