### **Product Name :** Pressure Distribution On A Cylinde

#### Product Code : LBNY-0005-10300022

#### **Description :**

Pressure distribution around a cylinder subject to transverse incident flow Cylinder with radial hole for pressure measurement Determination of the pressure curve along the measuring section with up to 8 pressure measuring points In conjunction with total pressure sensor measurement of the total pressure in the wake of a cylinder Display and analysis of the measured values using the software Rotatable cylinder for pressure measurement at any angle adjustment Electronic detection of the angle Scale for angle adjustment.

#### **Technical Specification :**

**Technical Data:** Cylinder Inner diameter: 21mm Outer diameter: 25mm.

# ij
