Product Name :
Losses In Valves And Fittings

Product Code :
LBNY-0005-103000232

Description :

Pipe elements are commercially standard components in heating and sanitary engineering
Pipe sections can be individually selected via ball valves
Investigation of the pressure losses at various shut-off valves and fittings
Flow measurement using rotameter
Flow can be adjusted via valves
Differential pressure measurement via differential pressure meter with display
Clear panel mounted on a sturdy, movable frame
Water connections with quick-release couplings.

Technical Specification :

Technical Data:

Angle seat valve, diameter
Screw-down valve, diameter
Ball valve, plastic, transparent, diameter
Gate valve, diameter
Ball valve, steel, diameter
Differential pressure meter
Measuring ranges
Pressure: -200...200mbar
Flow rate: 200...1700L/h.
