**Product Name :**  
Losses In Valves And Fittings

**Product Code :**  
LBNY-0005-103000232

**Description :**

Pipe elements are commercially standard components in heating and sanitary engineering  
Pipe sections can be individually selected via ball valves  
Investigation of the pressure losses at various shut-off valves and fittings  
Flow measurement using rotameter  
Flow can be adjusted via valves  
Differential pressure measurement via differential pressure meter with display  
Clear panel mounted on a sturdy, movable frame  
Water connections with quick-release couplings.

**Technical Specification :**

**Technical Data:**

Angle seat valve, diameter  
Screw-down valve, diameter  
Ball valve, plastic, transparent, diameter  
Gate valve, diameter  
Ball valve, steel, diameter  
Differential pressure meter  
Measuring ranges  
Pressure: -200...200mbar  
Flow rate: 200...1700L/h.
