Product Name : Change Of State Of Gase

Product Code : LBNY-0005-103000254

Description :

Experimental investigation of gas laws

Hydraulic oil filling for changing volume of test gas

Built-in compressor generates necessary pressure differences to move the oil volume

Transparent measuring tank 1 for investigation of isothermic change of state

Transparent measuring tank 2 for investigation of isochoric change of state

Electrical heater with temperature control in tank 2

Sensors and digital displays for temperatures, pressures and volumes

Compressor can also be used as vacuum pump

5/2-way valve for switching between compression and expansion.

Technical Specification :

Technical Data: Compressor / vacuum pump Pressure at inlet: 213mbar Pressure at outlet: 2bar Power output: 60W Temperature controller: PID, 300W, limited to 80C. Laboratory Instrument India
