Product Name :
Portable AC Motor Drive Troubleshooting Learning System

Product Code :
LBNY-0005-10500014

Description :

The Portable AC Motor Drive Troubleshooting Learning System uses electronic fault insertion, to teach basics of AC motor drive troubleshooting skills, such as drive input, motor input, and drive relay troubleshooting. Portable AC Motor Drive Troubleshooting Learning System features industry-standard components like a Rockwell Power Flex 4 variable frequency AC drive and a 3-phase AC motor used to teach the fundamentals of configuring and operating an AC drive. The Portable AC Motor Drive Troubleshooting Learning System is a compact, durable system that can be placed on a conference room table, shop floor desk, or practically anywhere when training space is limited. This learning system is a vital training addition to industries like packaging, textiles, and paper where rapid motor acceleration and deceleration are required. However, this AC motor drive troubleshooting learning system's small footprint doesn't sacrifice the comprehensive knowledge and skill building for which is known.

Features:

- Highly Engaging Interactive Multimedia
- Mobile, Durable, Compact Learning System
- Real-World Troubleshooting using Electronic Fault Insertion
- Build AC Motor Drives Skills Nearly Anywhere
- Student Reference Guide.

Technical Specification :

Portable AC Motor Drive Troubleshooting Learning System
