Product Name :
Coil Vessel Heat Exchanger

Product Code :
LBNY-0002-710016

Description :

Coil Vessel Heat Exchanger

Technical Specification :

Coil Vessel Heat Exchanger

Allows the study of heat transfer between hot water flowing through a coil and cold water contained in the vessel. The apparatus consists of fabricated shell, inside which coil tubes on outer side are fitted. The present set up is a heat exchanger, with cold water flows through shell.

Valves are provided to control the low rates of hot and cold water. Flow rates of hot and cold water are measured using Rotameters.

A magnetic drive pump is used to circulate the hot water from a re-cycled type water tank, which is fitted with heaters and Digital Temperature Controller.
