Product Name :
Portable Ac Dc Electrical Learning System

Product Code :
LBNY-0005-10500031

Description :

The Portable Ac Dc Electrical Learning System offers industry-relevant skills including how to operate, install, design, and troubleshoot basic AC and DC electrical circuits for various applications. Portable Ac Dc Electrical Learning System brings customers flexibility and convenience when there's a need to use a trainer in multiple locations or where space is too small for a full-size trainer. Portable Ac Dc Electrical Learning System teaches the fundamentals of AC and DC electrical systems used for power and control in industrial, commercial, agricultural, and residential applications. Combined with Portable Ac Dc Electrical Learning System world-class curriculum, this innovative product can provide learners with a thorough understanding of electrical power. The Portable Ac Dc Electrical Learning System includes a variety of switches and other components so learners can build different circuits, which will help them to recognize industrial component styles and learn how to troubleshoot them effectively.

Features:

- Features industrial components
- Interactive Multimedia to Engage the Learner
- Covers skills used in industrial, commercial, agricultural, and residential applications
- Durable and Efficient
- Portable system for use at multiple sites
- Learn about Electricity Nearly Anywhere
- Student Reference Guide.

Technical Specification :

Portable Ac Dc Electrical Learning System
