Product Name :
Electrical Fabrication Learning System

Product Code :
LBNY-0005-10500033

ELECTRICAL FABRICATION LEARNING SYSTEM

Description :

The Electrical Fabrication Learning System includes a workstation, wiring components, storage case, hand tool package, electrical consumable package, electrical accessories, and student curriculum in print, instructors assessment guide, and installation guide. Electrical Fabrication Learning System teaches students skills that are commonly used by electricians, technicians, and engineers in today's industry. Installing, operating, repairing, or designing equipment for modern industry requires fundamental knowledge of electrical wiring and components. Optional interactive multimedia extends the learning opportunity as well as allows students to learn in the style they need. Students will gain expertise in key skill areas such as basic electrical system wiring, interpreting wire installation plans, handling non-metallic cable, installing basic components such as switches, outlets, and lighting, and connecting electrical services.

Features:

Safety Emphasized at All Levels
Optional Interactive Multimedia
Hands-On, Job-Ready Industry Skills
Student Reference Guide.

Technical Specification :

Electrical Fabrication Learning System
