Product Name :
AC DC Electrical Learning System

Product Code :
LBNY-0005-10500034

Description :

AC DC Electrical Learning System training system covers industry-relevant technical skills including how to operate, install, design, and troubleshoot basic AC and DC electrical circuits for various applications. The AC DC Electrical Learning System includes a bench top-mount workstation, lamp module assembly, pushbutton switch module assembly, selector switch module assembly, circuit breaker module assembly, handheld digital meter, and much more! Learners will use these components to study topics such as manual input devices, voltage measurement, lighting circuits, voltage dividers, and troubleshooting. AC DC Electrical Learning System explores the fundamental concepts of AC and DC electrical systems. Learners will see how electricity is used for power and control in industrial, commercial, agricultural, and residential applications. This system uses industrial quality components for durability to stand up to frequent use and to help learners become better prepared for what they will encounter on the job.

Features:

- Features industrial components
- Integrated Workstation
- Covers skills used in industrial, commercial, agricultural, and residential applications
- Effective Component Inventory
- Emphasizes safety
- Offers many hands-on skills
- Multimedia Curriculum Available
- Student Reference Guide.

Technical Specification :
