Product Name :
Triangle Of Forces Apparatus

Product Code :
LBNY-0005-10600014

Description :

A bench mounted circular table with a central pin and 360° protractor has three pulleys on adjustable clamps round the edge.

The triangle of forces in equilibrium can be constructed and the resultant of two known forces can be found. Conditions of equilibrium are obtained by centralising a small cord ring over the central pin with cords to load hangers where the loads and lines of action are variable.

Technical Specification :

Triangle Of Forces Apparatus
