Product Name :
Analog Overlay Learning System

Product Code :
LBNY-0005-10600019

Description :

The main objective of this trainer is to teach the student of electronic circuits rather than focusing on the assembly of the components. To assemble and examine experiment is laborious. Electronic theory will be taught straightly out of book accordingly. Series will condition the students to visualize the function of experiment circuit.

Technical Specification :

Analog Overlay Learning System

Laboratory Instrument India
