Product Name :Stirred Refrigerated Tank

Product Code: LBNY-0005-10700014

Description:

Inner tank and outer casing made of stainless steel
Inner trap for emptying
Stainless steel measuring stick for the measuring of the milk level
DN50 threaded outlet connector with plug
Total primary surface evaporator with maximum yield
Non polluting polyurethane foam

Cooling System:

Compact design with space saving installation Non icing cooling even with low filling level R404A refrigerating fluid for all models Direct expansion.

Technical Specification:

Electric System:

Computerised milk controller system for the management of all operations:

Digital temperature display

Stirring program

Milk temperature check

Electrical feeding cables

230V 50HZ single phase feeding.
