

Email : sales@laboratoryinstrumentindia.com

Product Name :
Electronic Fuel Injection

Product Code :
LBNY-0005-1080003

Description :

The Electronic Fuel Injection experiments covered by the panel are:
Injection time calculation with oscilloscope
Injection time calculation with tachometer and dwell meter
Air temperature effect on the quantity of injected fuel
Signal analysis with oscilloscope
Study of injector activation signal at various conditions
Injection duration at various speeds, temperatures and engine loads
Oxygen sensor operation.
Valve position switch output signals
Valve position sensor output signals.
Relationship between the duration of injector opening to the quantity of injected fuel.

Technical Specification :

Electronic Fuel Injection
