Product Name :
Lighting Training System

Product Code :
LBNY-0005-1080009

Description :

Training board-simulator is a great educational tool that allows students to learn the structure of lighting system, study its components, and perform various measurements, tests and other diagnostic procedures. Fully functional Lighting Training System installed in a mobile aluminium frame and it is based on OEM components of VW/AUDI cars.

The main characteristics and functions of the Lighting Training System trainer are:

Adjustable level with the motors of front headlights.

Possible adjustments training with the headlight tester

Open contacts for measuring of system's components and circuits.

Electric wiring diagram with built-in banana plug jumpers for measurements and connecting or disconnecting the components

The Lighting Training System has the following diagnostic and measurement features:

Electronic control unit (ECU) identification

Displaying the operating system parameters (live data)

Control unit diagnosis

Throttle adaptation

Reading/erasing fault codes

Diagnosis through OBD 16 pin diagnostic connector

Activating the actuators (depending on the control unit).

Technical Specification :

Laboratory Instrument India
