Product Name :
Water Heater Module

Product Code :
LBNY-0002-710029

Description :

Water Heater Module

Technical Specification :

Water Heater Module

The Water Heater Module, is an efficient device for rapid and precise fluid heating.

Dual Overheating Protection

Advanced Thermostat & Thermal Cut-out Mechanism helps in maintaining the water temperature at the desired levels

Pressure Release Valve

Safeguards against damages resulting from pressure build-up, vacuum formation & reverse water flow

Safe and Pungent-free Water

Keeps the water pungent-free & hygienic with its multi-layered protection against Corrosion & Scaling.

Water Heater Module, Water Heater Module Equipments, Water Heater Module Tools, Water Heater Module Tool Kits, Water Heater Module Manufacturers, Water Heater Module Suppliers from India, China, Kenya
