Product Name :
Components Set Electrohydraulics

Product Code :
LBNY-0005-10900015

Description :

Hydraulic systems are very common in drive engineering. The set enables the trainee to study both hydraulics and electric systems. Components Set Electrohydraulics enables to set up various electrically controlled drives. These drives are often electrically controlled. Therefore, hydraulics and Electrohydraulics are very important for vocational training.

Technical Specification :

Time relay, 2 change over contacts, 0...30sec
Electric switching elements, 2 break contacts, 2 make contacts
4 way solenoid valves 24VDC: 2x 4/2-way valve, 2x 4/3-way valve
Set for Hydraulics Training System
2 relays, 4 change over contacts each
2 electrical limit switches, 1 make contact.
