Product Name :
Dimensional Metrology I Training Kit One

Product Code :
LBNY-0005-10900030

Description :

The dimensional metrology practice kit is designed for practical training in the metalworking trades. They were manufactured with the accuracy of CNC parts. All parts are clearly laid out and well protected on a plastic tray. The trays are stackable, providing for space-saving storage. The kit includes ten spacer plates, all of which differ to a minor degree in length and each of which is individually marked. The kit offers the advantage of being ready for use immediately; it contains everything required for the exercises. The test pieces used are flat stainless steel spacer plates.

Technical Specification :

All parts clearly laid out and well protected on a plastic tray
Measurement exercises on a stainless steel spacer plate
Instructional kit complete with test pieces and measuring aids
10 test pieces, each of different dimensions
Practice kit for dimensional metrology in the metalworking trades

Technical Data:

Test pieces: 13 lengths measurable
Steel ruler: 300mm
Vernier caliper gauge: 200mm
Set square: 90, l x w: 100x70mm.
