Product Name :
Prismatic Work Samples With Slanted Cut-Outs

Product Code :
LBNY-0005-10900044

www.laboratoryinstrumentindia.com

Description :

The instructional material includes a complete set of drawings. The geometric models support the learning process by providing an introduction to technical drawings: from the solid model to the more abstract representation of the three views in a technical drawing. It presents each model in three views, as well as its 3D view and production drawing. The set contains 18 aluminium drawing models. The prismatic models have cut-outs parallel to, and at an angle to, the edges of the prisms. The models are precision-manufactured and are suitable for measurement exercises as well as drawing exercises.

Technical Specification :

Model set providing an introduction to technical drawing
All parts clearly laid out on a practical tray
Multiple trays stackable
Set of 18 prismatic models, made from aluminium, with anodised finish
Models with slanted cut-outs
Lesson-supporting instructional material
Finely graduated degrees of difficulty within the model series.
