Product Name :
EV Traction Battery Pack Loading and Testing Training Platform

Product Code :
LBNY-0002-660014

Description :

EV Traction Battery Pack Loading and Testing Training Platform

Technical Specification :

Independent heat source channel, temperature control and speed regulation fan.
All channels are under isolated test, it can directly test the modules of the battery pack.
The LED light indicates the running status, testing status, matching status, and alarm status.
Compatibility with all kinds of the lead acid and lithium batteries.
Online test between computer and device, the setting and result are particular and plentiful,
Work step automatically switching.
The charge and discharge parameters can be customized, like charge voltage.
The temperature monitoring function can monitor the temperature of each battery in real-time, and automatically stop the charging and discharging when the battery temperature reaches the set maximum temperature.

EV Traction Battery Pack Loading and Testing Training Platform, EV Traction Battery Pack Loading and Testing Training Platform Equipments, EV Traction Battery Pack Loading and Testing Training Platform Tools, EV Traction Battery Pack Loading and Testing Training Platform Tool Kits, EV Traction Battery Pack Loading and Testing Training Platform Manufacturers, EV Traction Battery Pack Loading and Testing Training Platform Suppliers from India, China, Kenya

Laboratory Instrument India
