Product Name :
Heat Exchanger Bench Top Study Unit

Product Code :
LBNY-0005-11200053

Description :

A bench top service unit makes it possible to supply hot water to different types of heat exchangers, which are small scale versions of the commonly used industrial ones. The Heat Exchanger Bench Top Study Unit has been designed to carry out experiments concerning the main techniques of heat transfer. Thus the student can compare their performance, fully understand the importance of a correct choice and, if possible, compare the influence of co-current and counter-current heat exchange.

Technical Specification :

Heat Exchanger Bench Top Study Unit
