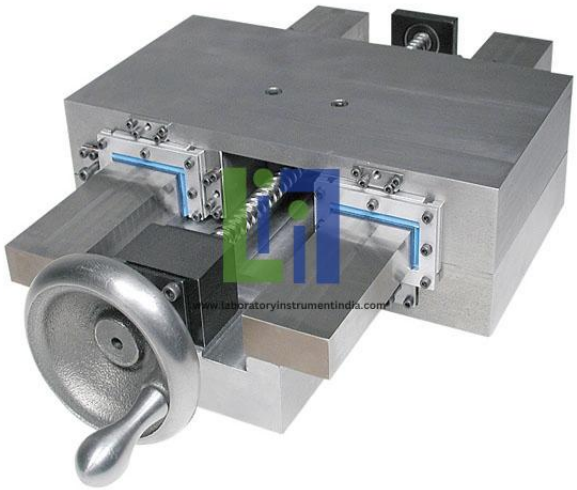
Product Name : Roller Pack Machine Tool Axis Learning System	**Product Code :** LBNY-0005-1140008



Description :

Roller-pack bearings are precision bearings made specifically for the machine tool axes to provide precision positioning of the axis under heavy load. The Roller Pack Machine Tool Axis Learning System adds Mechanical Drives 1 Learning Systems to teach machine tool axis drives based on the roller-pack type bearing. Students will learn industry-relevant skills related to this new topic including operation, installation, performance analysis, troubleshooting, and design.
The axis can also be combined with the ball screw components of the Mechanical Drives 4 System to become a fully operational machine tool axis. The Roller Pack Machine Tool Axis Learning System includes 12 roller-pack bearings and other components to assemble a machine tool axis; student learning materials for both theory and lab, and teachers guide.

Features:
Industry-relevant skills
Teaches machine tool axis drives based on the roller-pack type bearing.

Technical Specification :

Roller Pack Machine Tool Axis Learning System
