Product Name :
Machine Tool Chip Conveyor Learning System

Product Code :
LBNY-0005-11400013

Description :

Machine tool chip conveyors are used to carry away the metal chips produced by machine tools. They use heavy-duty steel link belts usually arranged in a serpentine shape. The Machine Tool Chip Conveyor Learning System adds to Mechanical Drives 1 Learning System to teach skills related to machine tool chip conveyors. Students will learn industry-relevant skills related to this new topic including operation, installation, alignment, maintenance, and troubleshooting. Machine Tool Chip Conveyor Learning System uses industrial quality components to help students become better prepared for what they will encounter on the job and to withstand frequent student use. The Machine Tool Chip Conveyor Learning System includes an operational floor-standing chip conveyor; student learning materials for both theory and lab, and teachers guide.

Features:

Features industrial quality components
Teaches skills related to machine tool chip conveyors.

Technical Specification :

Machine Tool Chip Conveyor Learning System
