Product Name :
Mechanical Fabrication Learning System

Product Code :
LBNY-0005-11400018

Description :

Mechanical Fabrication Learning System includes a workstation, precision fabrication parts set, mechanical fabrication tool set, standard parts set, component kit, skills part kit, tool kit, hardware kit, bolt stretch kit, student curriculum, instructors assessment guide, and installation guide. Mechanical Fabrication Learning System will focus on the proper and safe application of basic hand tools used in mechanical fabrication assembly. Mechanical Fabrication plays an important role in today's economy as the cost to produce goods increases and the profit margins shrink. In our information-based world, students increasingly do not have knowledge or skills for mechanical fabrication. To stay competitive, companies must manufacture high-quality goods. Also offers the option to expand our strong print-based curriculum with interactive multimedia so that students can learn mechanical fabrication skills and concepts in the style they need.

Features:

- Safety Emphasized at All Levels
- Quick Setup/Cleanup and Easy Inventory
- Industry Skills
- Expansion of Basic Skills
- Student Reference Guide
- Multimedia Curriculum Available.
