**Product Name :**  
Drag Force Investigation

**Product Code :**  
LBNY-0005-11700058

**Description :**

The cylinder has a radial tapping to allow investigation of the pressure distribution around the cylinder. A short duct with integral load balance allows the drag of a body to be directly measured at a range of approach velocities.

The bodies include an aerofoil, cylinder and plate.

**Technical Specification :**

Drag Force Investigation
