Product Name :
Laboratory Water Bath

Product Code :
LBNY-0001-510011

Description :

Laboratory Water Bath

Technical Specification :

Stainless Steel, insulated double walled,

Inner wall of stainless steel,

Aluminium /SS cover,

Brass drain cock,

Temperatures setting: Digital microprocessor display to set temperature point preventing thermal

Thermostatic temp. control from ambient to 85 -100° C (?0.50) complete with immersion heater,

Power supply: 220-240 volts AC, 50Hz. ;

Power: 480W;

Seamless reservoir with no welds to leak or rust, see- through cover is hinged and removable, and steeply gabled to accept taller sample

Boiling Chamber, Lid, Cooling Condenser and any other part coming into contact with water / steam made of quality stainless steel.

Capacity: 25 L
