Product Name :
Truck Ball Nut Hydraulic Steering Gear

Product Code :
LBNY-0005-12000021

Description :

The steering shaft makes a pivoting movement. When the steering spindle is turned, one sees the function of the hydraulic control with the torsion bar, rotary valve, control jack and radial grooves. When the steering spindle is turned with the help of the cross button, the steering nut plunger is displaced in the housing cylinder.

The following can also be seen:
Steering-sector shaft and the balls in the cutaway ball cage
Steering stop valve
Ball nut plunger with tothing.

Technical Specification :

Truck Ball Nut Hydraulic Steering Gear
