Product Name :
Differential Gear With Hypoid Gearing

Product Code :
LBNY-0005-12000043

Description :

The small gear shaft (hypoid pinion side) is offset from the larger gear shaft (hypoid gear side). Hypoid Gears: are cone shaped gears similar to spiral bevel gears except they transmit motion between non-intersecting shafts.

Differential Gear

Possible demonstrations:

Functions of the differential bevel gears when one wheel spins while the other stands still.

Function of the final drive.

Functions of the differential bevel gears when driving in a straight line and when cornering.

Technical Specification :

Differential Gear With Hypoid Gearing
