Product Name :
Five Gear Front Automatic Transmission

Product Code :
LBNY-0005-12000050

Description :

The transmissions in the individual gear steps are not implemented with planetary gear trains, but with spur gears. In the cutaway torque converter, one sees the pump and turbine wheel, the free wheel and the converter lockup clutch. A very extensive description of the function is supplied. The shifting processes are initiated electronically, with the gears being shifted by hydraulic clutches via the electro-hydraulic control unit.

Technical Specification :

Five Gear Front Automatic Transmission
