Product Name :
Active Body Control Suspension Strut

Product Code :
LBNY-0005-12000059

Description :

Behind the cutaway spring, the attenuator, the hydraulic cylinder for level regulation and, in the hollow piston rod, the suspension strut control device are easily visible. Active suspension and attenuation system with hydraulic cylinder, helical spring and attenuator.

Functions in the vehicle:

In bends and on un-even roads as well as in braking and accelerating, rolling and pitching motions are practically completely suppressed. The level regulation enables manual and speed-dependent automatic lowering and raising of the level of the vehicle.

Technical Specification :

Active Body Control Suspension Strut
