**Product Name :**  
Two Stage Turbocharger

**Product Code :**  
LBNY-0005-12000063

**Description :**

The result is optionally higher power density and, in conjunction with Miller engine cycle, reduced exhaust emissions and lower fuel consumption. The Two-Stage Turbo charging the charge air pressure can be increased substantially.

Exhaust air, fresh air and oil channels are accentuated in colour.

Both turbochargers control flaps and the fresh-air valve.

The turbines and throttle valves can be moved.

**Technical Specification :**

Two Stage Turbocharger

**Laboratory Instrument India**
