Product Name :
Injector For Engines With Direct Petrol Injection

Product Code :
LBNY-0005-12000079

Description :

As all the parts of the injector are multiple laser-welded, it is not possible to cut away these parts any further. The benefit of these injectors is that they switch extremely quickly and thus inject minimum quantities of fuel, which makes multiple injection (3) possible.

The following can be seen:

- Electrical connections for voltage supply to the piezo-actor module
- Cutaway injector housing and interior housing
- Teflon ring for sealing in the cylinder head
- Fuel flow (high pressure)
- O-ring to seal the leakage line
- Nozzle module
- Coupler module.

Technical Specification :

Injector For Engines With Direct Petrol Injection
