Product Name :
Common Rail Injection

Product Code :
LBNY-0005-120000109

Description :

The fuel is fed by the feed pipe (gear wheel pump, cutaway) to the high-pressure pump. By turning the clamp screw grip, you see the generation of the high pressure. On this modelboard, the most important elements of the common rail injection unit can be setup and connected to fuel lines. On the left and right of the cut-away manifold, you can see the rail pressure sensor and the rail pressure transmitter. From here, the fuel is pushed into the cutaway manifold and then enters the injectors. Further, the return passage of the fuel can be seen.

Technical Specification :

Common Rail Injection
