Product Name :
Brake Rig And Discs ABS

Product Code :
LBNY-0005-120000115

Description :

Fully portable, suitable for classroom demonstrator and practical exercise in the workshop. The Brake Rig offers an enhanced training resource, hands-on training with real component and greater understanding for the student without the constraints of the modern motor vehicle. Indicator lamps fitted for handbrake and foot brake operation. Complete with master cylinder and servo, disc / drum assembly hand brake and foot brake. Optional indicator lamp for handbrake and foot brake. Self contained, fully operational Brake Rig, Cross diagonal hydraulic circuit.

Technical Specification :

Hand brake and brake pedal with switches
Fitted with original ABS system including ABS unit, wheel speed sensors and diagnostic socket
Fully operational, self contained Brake Rig, cross diagonal hydraulic circuit
Including front and rear disc assemblies, master cylinder and servo
Powder coated paint finish
Brake taillight fitted
Brake components mounted on a frame complete with castors.

Dimensions:
Length 1300mm, Width 800 mm, Height 1350 mm
Weight: 130kg.
