Product Name :
Brake Rig Ford Disc And Drums ABS

Product Code :
LBNY-0005-120000116

Description :

Fully portable, suitable for classroom demonstrator and practical exercise in the workshop.
Self contained, fully operational Brake Rig, Cross diagonal hydraulic circuit.
The Brake Rig offers an enhanced training resource, hands-on training with real component and greater understanding for the student without the constraints of the modern motor vehicle.
Indicator lamps fitted for handbrake and foot brake operation.
Complete with master cylinder and servo, disc / drum assembly hand brake and foot brake.
Optional indicator lamp for handbrake and foot brake.

Technical Specification :

Brake pressure indication with gauges
Brake taillight fitted
Hand brake and brake pedal with switches
Fully operational, self contained Brake Rig, cross diagonal hydraulic circuit, based upon FORD
Brake components mounted on a frame complete with castors
Powder coated paint finish
Including disc and drum Brakes, master cylinder and servo
Fitted with original ABS system including ABS unit, wheel speed sensors and diagnostic socket.

Dimensions:
Length 1300mm, Width 800 mm, Height 1350 mm
Weight: 130kg.
