Product Name :
Brake Rig Ford Disc And Drums ABS

Product Code :
LBNY-0005-120000125

Description :

Self contained, fully operational Brake Rig, Cross diagonal hydraulic circuit.
The Brake Rig offers an enhanced training resource, hands-on training with real components and greater understanding for the student without the constraints of the modern motor vehicle.
Fully portable, suitable for classroom demonstrator and practical exercise in the workshop.
Indicator lamps fitted for handbrake and foot brake operation.
Complete with master cylinder and servo, disc / drum assembly handbrake and foot brake.
Optional indicator lamp for handbrake and foot brake.

Technical Specification :

Fully operational, self contained Brake Rig, cross diagonal hydraulic circuit, based upon FORD
Brake pressure indication with gauges
Hand brake and brake pedal with switches
Including disc and drum Brakes, master cylinder and servo
Fitted with original ABS system including ABS unit, wheel speed sensors and diagnostic socket
Brake components mounted on a frame complete with castors
Powder coated paint finish
Brake taillight fitted.

Dimensions:
Length 1300mm, Width 800 mm, Height 1350 mm
Weight: 130kg.
