Product Name :
Board Electronic Engineering Lab

Product Code :
LBNY-0002-610020

Description :

Board Electronic Engineering Lab

Technical Specification :

Board

Workstation consists of a prototyping board.

Several other features that are essential for laboratory.

The Educational Laboratory Virtual Instrumentation Suite gives you a modular teaching platform to build the right lab experience for your course. What you can expect:

An Ecosystem of Partners and Teaching Solutions

Save on space, time, and cost with our flexible and extensible ecosystem of application-specific products by leading partners in education and technology

Industry Relevant Technology

Integrated into is the same Data Acquisition (DAQ) device used by industry

12 Integrated Instruments in 1 Device

Build technical expertise with the oscilloscope, digital multimeter, function generator, dynamic signal analyzer, and more.

Board Electronic Engineering Lab, Board Electronic Engineering Lab Equipments, Board Electronic Engineering Lab Tools, Board Electronic Engineering Lab Tool Kits, Board Electronic Engineering Lab Manufacturers, Board Electronic Engineering Lab Suppliers from India, China, Kenya
