Product Name :
PSA HDI

Product Code :
LBNY-0005-120000147

Description :

Self contained, fully operational Fuel Injection Board.

The fuel injector board offers an enhanced training resource, hands-on training with real components, better understanding for the student without the constraints of the modern motor vehicle.

Complete with all actuators and sensors. Manufactured using components from the original engine build. Components arranged for ease of use and identification.

Pin-out facility on all electrical components using 2 mm sockets enabling real-time values to be taken without compromising the wiring harness.

Available in dry running, using LEDs to indicate injection operation.

Diagnostic sockets fitted

Technical Specification :

Dry running operation using LED's to indicate injection operation

Fitted with manufacturer's diagnostic socket

Based on a PSA Peugeot/Citroen HDI common rail diesel engine, complete with all actuators and sensors, with Bosch 15C2 engine management system

Rotating parts covered by mesh guards

Board mounted in a vertical frame with castors

Pin-out facility on all electrical components using 2mm sockets enabling real-time values to be taken without compromising the wiring harness

Powder coated paint finish.

Dimensions:

Length 1000mm, Width 750 mm, Height 1950 mm
Weight: 85 kg.
