Product Name :
Diesel Pre Heat Glow Plug System

Product Code :
LBNY-0005-120000161

Description :

Complete with all actuators and sensors. Manufactured using components from the original engine build. Components arranged for ease of use and identification.

Diagnostic sockets fitted

Self contained, fully operational Fuel Injection Board.

Pin-out facility on all electrical components using ~ 2 mm sockets enabling real-time values to be taken without compromising the wiring harness.

The fuel injector board offers an enhanced training resource, hands-on training with real components, better understanding for the student without the constraints of the modern motor vehicle.

Available in wet running version or dry running, using LEDs to indicate injection operation.

Technical Specification :

Based on a FORD Focus, complete with all actuators and sensors, with EEC-V engine management system

Fitted with manufacturer's diagnostic socket

Pin-out facility on all electrical components using ~ 2 mm sockets enabling real-time values to be taken without compromising the wiring harness

Dry running operation using LED's to indicate injection operation

Board mounted in a vertical frame with castors

Rotating parts covered by mesh guards

Powder coated paint finish.
