Product Name:
Auto Lighting System Board Including Alternator

Product Code:

Description:

Demonstration board using original components including headlights, side lights, indicators and spotlights. The alternator ismotor driven via a special controller to demonstrate the charging circuit. Self contained, fully operational AutomotiveLighting System, manufactured using real components. The system is powered by a 12 V DC battery for the electrical circuit and by 240 V AC for the speed controlled motor.

Technical Specification:

Fully operational auto electrical trainermanufactured using original components

Rotating parts covered by mesh guards

Board mounted in a vertical bench frame

Based on a generic auto electrical system, complete with charging and lighting system

Variable speed control for alternator

Powder coated paint finish

Components include: Alternator (motordriven), Headlights, Side lights (front & rear), Indicators, Brake lights, Control dash panel, Relays and Battery isolator.

Supply Voltage:

12 V and 240 V.
