Product Name :
Auto Lighting System Board Including Alternator Ignition

Product Code :
LBNY-0005-120000167

Description :

Self contained, fully operational Automotive Lighting System, manufactured using real components. A functional contact breaker ignition is mounted on the board. The system is powered by a 12 V DC battery for the electrical circuit and by 240 V AC for the speed controlled motor. Demonstration board using original components including headlights, side lights, indicators and spotlights. The alternator is motor driven via a special controller to demonstrate the charging circuit.

Technical Specification :

Fully operational auto electrical trainer manufactured using original components
Board mounted in a vertical bench frame
Rotating parts covered by mesh guards
Based on a generic auto electrical system, complete with charging and lighting system
Variable speed control for alternator
Powder coated paint finish
Components include: Alternator, Head lights, Side lights, Indicators, Brake lights, Control dash panel, Relays and Battery isolator, Contact Breaker Ignition.

Supply Voltage:
12 V and 240 V.
