**Product Name :**  
Trailer

**Product Code :**  
LBNY-0005-120000174

#### **Description :**

In conjunction with one of the panels Rear lighting or Rear lighting this unit can be used and connected according to the circuit diagram. This module panel expands your system to all typical trailer lights of a modern car.

#### **Features:**

Use standard workshop measuring and testing devices for diagnosis and troubleshooting  
Connect all original automotive components according to the wiring diagram  
43 x connectors in 4mm safety design, 10 x with a bridge plug, for wiring and for measuring  
Quick and easy insertion of hidden practical errors in the circuit design.

#### **Learning Objectives:**

Selecting and using electrical measuring and testing devices  
Measurement and evaluation of electrical values and signals  
Read and use vehicle wiring diagrams  
Identify electrical and electronic components, assemblies and systems  
Testing and maintenance of electrical and electronic circuits  
Retrofitting of auxiliary systems, connect trailer socket and trailer plug, control circuits and load circuits.

#### **Technical Specification :**

Dimensions: L x H x D: 956 x 250 x 140 mm  
Power supply: 12 Volt DC  
Weight: about 4 kg.
