Product Name :
Wind shield Wiper LIN Bus

Product Code :
LBNY-0005-120000175

Description :

In conjunction with the control panel Controls CAN-Bus this unit can be controlled and connected to the network. The Wind shield Wiper LIN Bus module panel expands your system to a modern wind shield wiper system.

Features:

Use standard workshop measuring and testing devices for diagnosis and troubleshooting
10 x connectors in 4mm safety design, 2 x with a bridge plug, for wiring and for measuring
Connect all original automotive components according to the wiring diagram
Wiper is designed with original linkageredirector, with 6mm glass pane and rain sensor
Integrating the LIN bus components in the networked system
Cross linking of the system by connecting power supply and bus lines of all control units, thus all lines are measurable and can be separated for diagnostic purposes.

Learning Objectives:

Selecting and using electrical measuring and testing devices
Measurement and evaluation of electrical values and signals
Read and use vehicle wiring diagrams
Identify electrical and electronic components, assemblies and systems
Data communication with LIN-Bus
Testing and maintenance of electrical and electronic circuits.

Technical Specification :

Dimensions: L x H x D: 956 x 250 x 140 mm

Power supply: 12 Volt DC
Weight: about 7 kg.
